Narrative Exp	planation	
I performed a random inspection today and found Multiple	inadequacies that need to be	addressed.
0201/0207 Daily waste removal: There are large amount of	feces in all the kennels includi	ng feline litter boxes
there is also feces in the walkways. Ms. Yates states the wor		
removal has not been done in several days. Enclosures mus		
noted during last inspection.		
0201 Hot and cold water present: There is currently no hot w	water in kennel building Ms. Ya	ates she had the hot
water heater disconnected. Food and water receptacles sha		
disinfectant.		
0101 Origin of animals Ms. Yates could not provide records	regarding the origin of the ani	mals, she states some
were born at the facility and have been there many years ot		
provided regarding the origin, medical treatment and veter		
on rabies vaccines.		<u>cammais are correta</u>
0202/0204 Imperv./Sanitary surf., indoor: Concrete floors the	roughout facility are damp. flo	or needs to be sealed
so it is impervious to moisture.	roughour racing are damp, no	or needs to be sealed
0202 Ventilation, indoor: The lower kennel is not being prop	perly ventilated upon entoring	my over and threat
began to burn, it appeared the litter boxes have not been cl		
doors and windows closed so the goats will not enter the bu		
mmediately.	<u>anding. This area must have so</u>	me type of ventilation
<u> 2204 Solid resting surface: Multiple canine are walking and r</u>	enetina in colon lesses de Domeste	

0207 Grounds overgrown: The grounds in front of the facility are overgrown there is a large amount of debris/

animals throughout the facility to prevent them form walking and resting on wire surfaces.

trash throughout yard.

2027 Method of sanitation: Several of the kennels have large amount of hair and feces on the cages. Remove animals clean and sanitized kennels two times per day as noted during last inspection There is a strong odor throughout facility this is due to lack of proper cleaning and sanitizing as noted during last inspection. 2024 Surf. impervious to moisture: There is damp wood chips in multiple kennel I was unable to determine wood chips are damp for moisture or urine. Remove all wood chips immediately. 2027 Method of sanitation: There are many empty food bags and water jugs in main kennel area. Remove all debris and trash in facility. 19A-32.1 (h): Owned animal surrender, ask if there has been a bite w/in 10 days: When receiving an animal facility must have a signed statement from owner. 2010 Veterinary treatment: All medications including immunizations must be documented, provide detailed documentation of all shots, medications, and veterinary treatment. 2024 Fence height >= 5 feet: Primary enclosures must be 5 feet in height and cages must have six sides. 2024 Drainage prev. cross contam: Wire cages above lower runs are allowing feces and urine to fall into lower tennels: Remove upper wire cages					
Narrative Explanation 2007 Enclosure sanitized 2x / day: There is feces in the walkways throughout the facility it is difficult to walk without stepping into feces. Floors throughout facility needs to be cleaned and sanitized a minimum of two times per days. 2007 Method of sanitation: Several of the kennels have large amount of hair and feces on the cages. Remove animals clean and sanitized kennels two times per day as noted during last inspection. There is a strong odor throughout facility this is due to lack of proper cleaning and sanitizing as noted during last inspection. 2004 Surf. impervious to moisture: There is damp wood chips in multiple kennel I was unable to determine wood chips are damp for moisture or urine. Remove all wood chips immediately. 2007 Method of sanitation: There are many empty food bags and water jugs in main kennel area. Remove all debris and trash in facility. 19A-32.1 (h): Owned animal surrender, ask if there has been a bite w/in 10 days: When receiving an animal facility must have a signed statement from owner. 2004 Fence height >= 5 feet: Primary enclosures must be 5 feet in height and cages must have six sides. 2004 Drainage prev. cross contam: Wire cages above lower runs are allowing feces and urine to fall into lower tennels. Remove upper wire cages.		Inspection results	Date of inspection		
Narrative Explanation D207 Enclosure sanitized 2x / day: There is feces in the walkways throughout the facility it is difficult to walk without stepping into feces. Floors throughout facility needs to be cleaned and sanitized a minimum of two times per days. D207 Method of sanitation: Several of the kennels have large amount of hair and feces on the cages.
